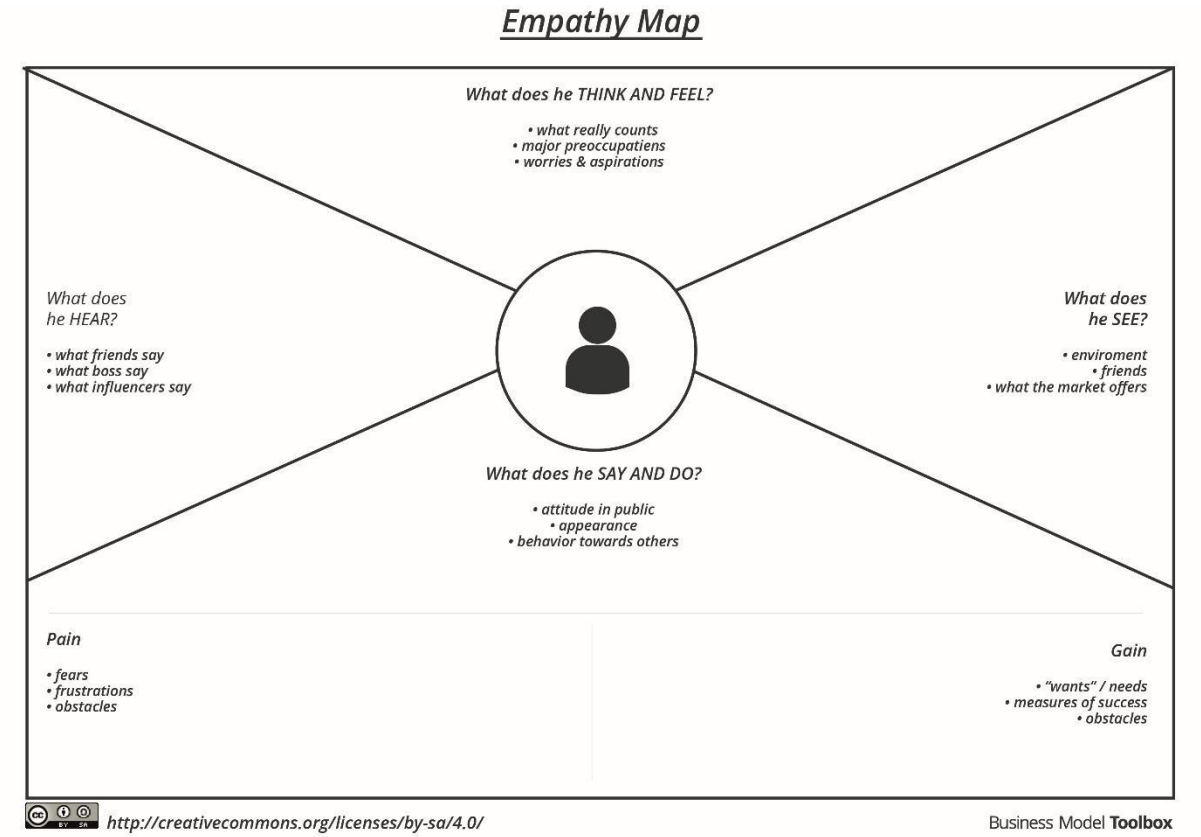
Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example:



Says
What have we heard them say?
What can we imagine them saying?

I need a secure and simple way to manage book records. Manually organizing books takes too much time.

Thinks
What are their worries, needs, hopes, and dreams? Neeat
What other thoughts might influence their behaviorss"?

How many book records do I have? Can I update, add, and delete books easily using one backend system?

Sri Chandana

Small Library Owner

Writes down book information manually. Updates and deletes book records one by one.

Does
What behaviors have we observed?
What can we imagine them doing?

Frustrated when managing book records. Worried about manual updates being inconsistent and errors.

Feels
What are their fears, frustrations, and anxieties? What other feelings might influence their behaviors"?
